Skill

Figma to Html – CSS Only
Bootstrap, Tailwindcss.

Dear Hiring Manager,

I am excited to apply for the Junior Frontend Developer position at Your Company. As a passionate and detail-oriented developer with a strong foundation in **CSS, Bootstrap, Tailwind and Figma to HTML conversion**. I am eager to contribute to your team and grow my skills in a collaborative environment.

Although I am at the beginning of my career, I have honed my ability to create responsive, visually appealing, and user-friendly web interfaces. My experience includes:

- Translating **Figma designs** into clean, semantic HTML and CSS code.
- Building responsive layouts using **Bootstrap** and **Tailwind CSS** to ensure seamless experiences across devices.
- Collaborating with designers and developers to bring creative visions to life.

I take pride in writing clean, maintainable code and paying close attention to design details. While I am still expanding my knowledge of JavaScript and other advanced frontend technologies, I am a quick learner and highly motivated to grow as a developer. I thrive in environments where I can contribute to meaningful projects while learning from experienced professionals.

Sincerely,

Kazi Robin,
